FEDERAL LABORATORY CONSORTIUM FOR TECHNOLOGY TRANSFER

*advancing federal
research and technology*

The Federal Laboratory Consortium for Technology Transfer (FLC) and the National Technical Information Service (NTIS) continuously collaborate on the process of Federal Technology Transfer.

The FLC is the nationwide network of federal laboratories that provides the forum to develop strategies and opportunities for linking laboratory mission technologies and expertise with the marketplace. The FLC consists of more than 300 federal laboratories.

As an agency of the U.S. Department of Commerce, the NTIS mission is to provide for the acquisition, archiving and dissemination of technological, scientific, and engineering information. Much of this permanent repository of information is the result of research conducted by federal laboratories that are members of the FLC. The collaborative effort of the FLC and NTIS ensures the perpetual availability of this vital collection of federally funded research to American businesses and industries. The National Technical Reports Library (NTRL) provides public access to the over 3 million records of which nearly 900K full-text reports (and growing) are publicly available.

Key to Database Fields Used

The following NTIS database fields are used in this short listing of recently acquired technical reports.

- **NTIS Order Number**
- **Title**
- **Source**
- **Report Year, Page Count**
- **Report Number/ISBN13** (if available)
- **Related Categories/Sub-categories** (where the document is also indexed)
- **Keywords**

RSS Feeds are available in your choice of NTIS Subject Category. For information use the RSS link on the NTIS Homepage and look for the Category RSS Feeds button.

NTRL is offering Public Access!

Developed by the Federal Science Repository Service

We appreciate the increase in Public Access Registrations.

Thank you for being a loyal user of the Public Access National Technical Reports Library (NTRL).

The Public Access NTRL is open to all users for search and discovery. Worldwide searching for federally funded bibliographic science and technology research information is now free on the Public Access NTRL website. We trust that you are finding the content relevant to your research needs.

We look forward to providing 21st century access. If you have additional questions regarding your future access to NTRL, please contact me at gguthrie@ntis.gov.

I hope you continue taking advantage NTRL's amazing content, and I'd appreciate hearing about your success.

Gregory G. Guthrie
Program Manager
National Technical Reports Library
National Technical Information Service

Testimonials from satisfied customers:

For years our library has collected and cataloged printed copies of research reports produced by state DOTs and by federal agencies through an informal documents exchange program. During that time we relied on NTIS to supply us with copies of key documents we "missed" during the process.

But in the current era of constrained resources and limited staff time, we find it hard to keep up with the quantity of documents we would like to make accessible to our patrons. These days we find that transportation agencies are dramatically scaling back their print runs, which has made the distribution mechanism we used in the past less feasible. Simultaneously our patrons have come to expect full-text desktop access to those reports.

The NTRL provides an affordable way to provide our patrons with direct desktop access to the kinds of technical reports our patrons need in pdf format, with an easy to use interface and a simple IP address authentication. We also appreciate the fact that NTIS provides us with usage statistics that show what reports are being downloaded and in what quantity.

That helps us justify our investment in NTRL to upper management. – VDOT Research Library, Charlottesville, VA

"Today, I thought I'd see if I could find where to get a copy of a technical report I wrote back in 1968. Using Google, I searched for the AD number. Up came a link to your website for it.

I established a personal account and was delighted to find that I could get an electronic pdf copy for free. Better yet, I found the electronic copy to be of quite high quality and had been OCR'd so that it was searchable. It was created in 1968 before any of today's modern technology existed.

To my knowledge, the only digitization of this report that I know of has been done by NTIS. Thus my delight in discovering it was done and available as a high quality pdf file."

Donald M. Rosencrantz, Research Associate – Institute of Nautical Archaeology

"Very often the work described in these [early NTIS] reports was never published in the open journal literature, or published only in a very condensed form. I have repeatedly found that information in these documents gave important inspiration for my new research, or, in some cases, preventing me from "re-inventing the wheel." ...

NTIS provides a valuable service. - Univ. of Colorado Engineering Professor

IMPORTANT NOTICE: BEGINNING OCTOBER 1, 2016 ALL SUBSCRIBERS TO THE NATIONAL TECHNICAL REPORTS LIBRARY (NTRL) (Discontinued by the Federal Science Depository Service) WILL HAVE OPEN AND PUBLIC ACCESS FREE OF CHARGE.

August 2016

Announcing Open NTRL

In October 2014 NTIS announced four levels of access to the **National Technical Reports Library (NTRL)**;

- **Public NTRL** - open access to all bibliographic and abstract content with a link to the NTIS Webstore for purchasing.
- **Public NTRL with Customer Registration** – open access to bibliographic and abstract content plus access to all electronically available reports.
- **Premium NTRL for Individuals** – paid subscription that included more powerful search and results management as well as **Digital-on-Demand Services** for content that was not in digital format.
- **Premium NTRL for Institutions** – all the added benefits of Premium NTRL for individuals plus management tools.

The demand for **Premium NTRL Services** was much lower than forecast. Therefore beginning October 1, 2016 NTIS will be discontinuing all **Premium NTRL Services**. NTIS will no longer accept new Premium NTRL subscription requests and beginning October 1, 2016 we will begin to process pro-rata refunds to current **Premium NTRL** subscribers. **Digital-on-Demand** services will be discontinued at that time.

Public NTRL will be relaunched on October 1 as **Open NTRL**. **Open NTRL** will include the following advanced search capabilities now available only in **Premium NTRL**:

- **Search by title words**
- **Search by source agency**
- **Search by author**
- **Search can be limited by year of publication**
- **Search can be limited to documents available in full text**
- **Search results in access to all full text reports in digital format.**

Customer registrations and password access features for all NTRL services will be discontinued for the **Open NTRL**. **Open NTRL** will be freely available worldwide.

We look forward to providing 21st century access. If you have additional questions regarding your future access to NTRL, feel free to contact me at gguthrie@ntis.gov.

NTRL INCREASES ACCESS TO FEDERAL S&T REPORTS

NTIS has launched greater access to federally funded science & technology information and reports. Starting in October 2014, U.S. citizens have free access to all electronically-available documents in the NTIS collection.

Currently there are more than 850,000 documents digitized for free public access. For the first time, Individuals have the option to subscribe to the NTRL in order to benefit from the Premium features of the database, such as advanced search, more free downloads, and digitization-on-demand (NTRL Premium Institutional).

Please feel free to contact me if you have any questions.

CENDI (Commerce, Energy, NASA, Defense Information Managers Group)

CENDI (Commerce, Energy, NASA, Defense Information Managers Group) is an interagency group of senior Scientific and Technical Information (STI) managers from 14 United States federal agencies.

CENDI traces its roots to the Committee on Scientific and Technical Information (COSATI) of the Federal Council on Science and Technology. COSATI was established in the early 1960s to coordinate the management of the results from the U.S. government's increasing commitment to scientific research and technology development. The scientific and technical information (STI) managers of the government's major research and development (R&D) agencies worked within COSATI to standardize guidelines for cataloging and indexing technical reports. COSATI ceased formal operations in the early 1970s.

To continue the cooperation begun under COSATI, managers of agency STI programs from Commerce (National Technical Information Service), Energy (Office of Scientific and Technical Information), NASA (HQ/STI Division), and Defense (Defense Technical Information Center) began meeting periodically to discuss common topics and stimulate more effective cooperation.

In 1985, a Memorandum of Understanding was signed by the four charter agencies and CENDI was established. From this small core of STI managers, CENDI has grown to its current membership, which represents the major science agencies, the national libraries, and agencies involved in the dissemination and long-term management of scientific and technical information.

Public Access Plans of U.S. Federal Agencies

Additional Public Access Plans will be posted as agencies release them.

In a memo released by the Office of Science and Technology Policy (OSTP) on February 22, 2013, each Federal agency with over \$100 million in annual conduct of research and development expenditures was directed to develop a plan to support increased public access to the results of research funded by the Federal Government. This included any results published in peer-reviewed scholarly publications that are based on research that directly arises from Federal funds, as defined in relevant OMB circulars (e.g., A-21 and A-11).

The full memo can be viewed at <https://www2.icsu-wds.org/files/ostp-public-access-memo-2013.pdf>.

Some agencies not subject to the OSTP memo are voluntarily developing Public Access Plans and are included below.

PB2016103446

Current Regulations Related to the Propagation, Transport, and Release of Hatchery Raised Oysters in the U.S. Gulf of Mexico.

Gulf States Marine Fisheries Commission, Ocean Springs, MS.; National Oceanic and Atmospheric Administration, Washington, DC.; Alabama Dept. of Conservation and Natural Resources, Montgomery.; Louisiana Dept. of Wildlife and Fisheries, Baton Rouge.; Florida Fish and Wildlife Conservation Commission, Tallahassee.

Aquaculture worldwide continues to gain ground in an attempt to supply the needs of the human population with quality seafood products in an environment of greater and greater restrictions on wild-caught products, and, in some cases, dwindling natural populations of wild seafood species.

The culturing of oysters for both enhancement (supplementing existing wild populations) and commercial harvest (on-bottom and off-bottom production), has led to many of the state marine agencies further considering how cultured products and the source of broodstock within the context of intense culture are handled. This document attempts to describe existing laws, rules, regulations, and protocols related to oyster culture and the transfer of hatchery-raised oyster larvae across state lines to allow for expansion of hatchery work in the region.

Oyster populations in the Gulf are driven by various factors which include physical, chemical, and biological controls such as the occurrence of hypoxia, predators, and disease as well as from commercial fishing pressure (VanderKooy 2011). In addition, prevailing environmental conditions can reduce commercial production due to reef closures resulting from public health concerns.

* Scope Notes define the specific topical content for each category;

<http://www.ntis.gov/assets/pdf/scopenotes.pdf>

** Quantities represent each new report assigned on average to 3-5 categories.

NTRL

NATIONAL TECHNICAL REPORTS LIBRARY
U.S. Department of Commerce

The National Technical Reports Library (NTRL) enhances accessibility to the NTIS technical reports collection. It provides access to:

- Bibliographic records of more than 2,500,000 technical reports
- Downloadable full text of 850,000 of these reports in PDF format

Subscription rates are based on the number of IP's.

The NTRL operates on a system interface that allows users to do queries on the large NTIS bibliographic database. The intent is to broadly expand and improve access to over 2 million bibliographic records (pre-1960 to present) and 800k full-text documents in PDF format that are directly linked to that bibliographic database.

For more information, go to:

<http://www.ntis.gov/products/ntrl/>

Just Revised: the NTIS Database Search Guide

Gain an in-depth understanding of the NTIS database structure with this new guide:

- Comprehensive list of NTIS Categories
- Helpful information and search hints
- Reference Guide to online commercial services and the NTRL
- Great Reference Manual & Teaching Tool

Subject Category Codes/Classification

NTIS classifies citations into 39 subject categories. Each of these subject categories is divided into subcategories. This method provides sorting categories for both hard and soft sciences. All subject categories consist of three character codes: two numerics and one alpha character. The numeric codes represent entire categories the alpha codes are used to designate subcategories within these broad categories. The number of NTIS subcategories posted to an information product average from three to five, although there are some reports with more.

Any of the technical reports listed in this newsletter can be ordered directly from the National Technical Information Service, simply click on the title to go to the product detail page on NTIS.GOV.

Developed by the Federal Science Repository Service, subscriber to the National Technical Reports Library, most of the reports listed can be downloaded free there. For information on how to subscribe to NTRL, go to <http://www.ntis.gov/products/ntrl/>.

Title Index - For NTRL Users

The following is a list of the titles included in this month's issue, without links to the NTIS Web site. The list is in alphabetical order by title.

| NTIS Number | Category | Title |
|---------------------|---|-------|
| PB2016103395 | SEAMAP (Southeast Area Monitoring and Assessment Program) Environmental and Biological Atlas of the Gulf of Mexico, 2013. | 47D |
| PB2016103428 | Serious Injury Determinations for Small Cetaceans and Pinnipeds Caught in Commercial Fisheries off the North-east U.S. Coast, 2013. | 47D |
| PB2016103431 | Serious Injury Determinations for Baleen Whale Stocks along the Gulf of Mexico, United States East Coast, and Atlantic Canadian Provinces, 2008-2012. | 47D |
| PB2016103432 | Methodology for Assessing the Vulnerability of Marine Fish and Shellfish Species to a Changing Climate. | 98F |
| PB2016103433 | Trophic Structure of the Eastern Chukchi Sea: An Updated Mass Balance Food Web Model. | 47D |
| PB2016103434 | Atlantic States Marine Fisheries Commission Annual Report, 2015 to the Congress of the United States and to the Governors and Legislators of the Fifteen Compacting States. | 47D |
| PB2016103435 | Brief Description of Greater Atlantic Region Fish and Invertebrate Discard Estimation for the 2015 Update to the National Bycatch Report. | 98F |
| PB2016103436 | Discard Estimation, Precision, and Sample Size Analyses for 14 Federally Managed Species Groups in the Waters off the Northeastern United States, 2015. | 98F |
| PB2016103437 | Discard Estimation, Precision, and Sample Size Analyses for 14 Federally Managed Species Groups in the Waters off the Northeastern United States, 2016. | 98F |
| PB2016103438 | Applicability of Sonars for Habitat Mapping: A Bibliography. | 98F |
| PB2016103439 | Economic Baseline and Characterization of U.S. Gulf of Mexico Seafood Processors. | 98F |
| PB2016103440 | Economic Baseline and Characterization of U.S. Gulf of Mexico Dockside Seafood Dealers. | 98F |
| PB2016103441 | Benchmarking the 1999 EPAP recommendations with existing Fishery Ecosystem Plans. | 98F |
| PB2016103442 | Comparative Analysis of U.S. Federal Fishery Management to the FAO Ecolabelling Guidelines: A Self-Assessment. | 98F |
| PB2016103443 | Safety Incidents in the West Coast Catch Shares Fisheries. | 47D |
| PB2016103444 | Guidance on Fishing Vessel Risk Assessments and Accounting for Safety at Sea in Fishery Management Design. | 47D |
| PB2016103445 | Snapshot of NOAA Fisheries Data Collection of Commercial Fishery Costs. | 98F |
| PB2016103446 | Fisheries Management and You: A Guide to Public Involvement in North Carolina Marine Fisheries Management. | 47D |
| PB2016103447 | Economic Survey of the U.S. Gulf of Mexico Inshore Shrimp Fishery: Descriptive Results for 2012. | 98F |
| PB2016103448 | Economic Impacts of Catch Allocation from Commercial Fishery to Recreational Fishery in Hawaii. | 98F |
| PB2016103449 | Science in Action: Lessons Learned from Fish Spawning Habitat Restoration in the St. Clair and Detroit Rivers. | 98F |
| PB2016103450 | Gulf Menhaden Fishery of the Gulf of Mexico: A Regional Management Plan. | 47D |
| PB2016103451 | Proceedings from the Atlantic Billfish Research Program Symposium. Held in Galveston, Texas on March 11, 2008. | 98F |
| PB2016103452 | Economic Activity Associated with Commercial Fisheries and Shellfish Aquaculture in Northampton County, Virginia. | 98F |
| PB2016103453 | Guidelines for Marine Artificial Reef Materials. Second Edition. | 98F |
| PB2016103454 | Economic Outlook for Expansion of the Eastern Shore Farmers' Market: Seafood Handling, Storage, and Transportation Facility. | 98F |
| PB2016103455 | Management Profile for the Gulf and Southern Flounder Fishery in the Gulf of Mexico. | 47D |
| PB2016103456 | Current Regulations Related to the Propagation, Transport, and Release of Hatchery Raised Oysters in the U.S. Gulf of Mexico. | 47D |
| PB2016103457 | Status of Life History Sampling Conducted Through the Commercial Fisheries Bio-Sampling Programs in the Western Pacific Territories of American Samoa and Guam and in the Commonwealth of the Northern Mariana Islands. | 98F |

| NTIS Number | Category | Title |
|------------------------------|---|-------|
| PB2016103458 | Survey of Recreational Shrimpers in the Northern U.S. Gulf of Mexico. <i>Developed by the Federal Science Repository Service</i> | 98F |
| PB2016103459 | Digital Traceability for Oyster Supply Chains: Implementation and Results of a Pilot. | 47D |
| PB2016103460 | Status of Stocks 2015: Annual Report to Congress on the Status of U.S. Fisheries. | 47D |
| PB2016103461 | Blue Crab Fishery of the Gulf of Mexico, United States: A Regional Management Plan, 2015 Revision. | 98F |
| PB2016103462 | Economic Contribution of Marine Angler Expenditures in the U.S. Gulf of Mexico and Puerto Rico, 2011. | 98F |

PB2016103454

Economic Outlook for Expansion of the Eastern Shore Farmers' Market: Seafood Handling, Storage, and Transportation Facility.

Virginia Inst. of Marine Science, Gloucester Point. Sea Grant Program.; National Oceanic and Atmospheric Administration, Rockville, MD. Office of Sea Grant.

2008, 20p

Related Categories/Subcategories

98F - Fisheries & Aquaculture

96A - Domestic Commerce, Marketing, & Economics

98B - Agricultural Economics

Keywords: Commercial fisheries, Economic analysis, Seafood, Seafood handling, Storage, Transport, Seafood production, Economic impact, Harvesting, Eastern Shore Farmer's Market, Delmarva Peninsula

PB2016103455

Management Profile for the Gulf and Southern Flounder Fishery in the Gulf of Mexico.

Gulf States Marine Fisheries Commission, Ocean Springs, MS.; National Oceanic and Atmospheric Administration, Washington, DC.

2015, 200p

Related Categories/Subcategories

47D - Biological Oceanography

98F - Fisheries & Aquaculture

48B - Natural Resource Management

Keywords: Commercial fishing, Fishery management, Gulf of Mexico, Abundance, Life history, Seasonal movements, Recreational fishing, Aquatic habitats, Harvesting, Gulf flounder ('Paralichthys albigutta'), Southern flounder ('P. lethostigma')

PB2016103458

Survey of Recreational Shrimpers in the Northern U.S. Gulf of Mexico.

Gulf States Marine Fisheries Commission, Ocean Springs, MS.; National Oceanic and Atmospheric Administration, Washington, DC.; Louisiana Dept. of Wildlife and Fisheries, Baton Rouge.

2014, 38p

Related Categories/Subcategories

98F - Fisheries & Aquaculture

57H - Ecology

Keywords: Commercial fisheries, Shrimp, Gulf of Mexico, Commercial harvesting, Recreational fishing, Alabama, Louisiana, Mississippi, Marine fisheries, Recreational shrimpers

PB2016103459

Digital Traceability for Oyster Supply Chains: Implementation and Results of a Pilot.

Gulf States Marine Fisheries Commission, Ocean Springs, MS.; National Oceanic and Atmospheric Administration, Washington, DC.

2013, 58p

Related Categories/Subcategories

47D - Biological Oceanography

98F - Fisheries & Aquaculture

57H - Ecology

Keywords: Oysters, Fisheries management, Commercial fisheries, Traceability, Tagging, Harvest tags, Gulf of Mexico, Data capture, Digital traceability, Oyster industry

PB2016103456

Current Regulations Related to the Propagation, Transport, and Release of Hatchery Raised Oysters in the U.S. Gulf of Mexico.

Gulf States Marine Fisheries Commission, Ocean Springs, MS.; National Oceanic and Atmospheric Administration, Washington, DC.; Alabama Dept. of Conservation and Natural Resources, Montgomery; Louisiana Dept. of Wildlife and Fisheries, Baton Rouge.; Florida Fish and Wildlife Conservation Commission, Tallahassee.

2014, 38p

Related Categories/Subcategories

47D - Biological Oceanography

98F - Fisheries & Aquaculture

48B - Natural Resource Management

Keywords: Oysters, Gulf of Mexico, Hatcheries, Regulations, Transport, Propagation, Aquaculture, Populations, Commercial harvest

PB2016103460

Status of Stocks 2015: Annual Report to Congress on the Status of U.S. Fisheries.

National Oceanic and Atmospheric Administration, Washington, DC

2016, 7p

Related Categories/Subcategories

47D - Biological Oceanography

98F - Fisheries & Aquaculture

Keywords: Fisheries, Stock assessment, Fishery management, Commercial fishing, Overfishing, Marine fishes, Conservation, Monitoring, Fish Stock Sustainability Index (FSSI), Magnuson-Stevens Fishery Conservation and Management Act (MSA)

PB2016103457

Status of Life History Sampling Conducted Through the Commercial Fisheries Bio-Sampling Programs in the Western Pacific Territories of American Samoa and Guam and in the Commonwealth of the Northern Mariana Islands.

National Marine Fisheries Service, Honolulu, HI. Pacific Islands Fisheries Science Center; Joint Inst. for Marine and Atmospheric Research, Honolulu, HI. 2015, 62p

Related Categories/Subcategories

98F - Fisheries & Aquaculture

47D - Biological Oceanography

48B - Natural Resource Management

Keywords: Sampling, Life history, Coral reef fisheries, Bottomfish fisheries, Stock assessments, Growth, Longevity, Data collection, American Samoa, Guam, Commonwealth of Northern Mariana Islands, Annual Catch Limits (ACLs), Magnuson-Stevens Fishery Conservation and Management Act (MSA)

PB2016103462

Economic Contribution of Marine Angler Expenditures in the U.S. Gulf of Mexico and Puerto Rico, 2011.

Gulf States Marine Fisheries Commission, Ocean Springs, MS.; National Marine Fisheries Service, Washington, DC.

2008, 116p

Related Categories/Subcategories

98F - Fisheries & Aquaculture

48B - Natural Resource Management

43B - Economic & Community Development

96 - Business & Economics

Keywords: Marine recreational fishing, Outdoor leisure activity, Saltwater anglers, Fishing expenditures, State economy, Economic contribution, Sales, Income, Jobs, Gulf of Mexico (GOM), Puerto Rico

PB2016103461

Blue Crab Fishery of the Gulf of Mexico, United States: A Regional Management Plan, 2015 Revision.

Gulf States Marine Fisheries Commission, Ocean Springs, MS.; National Oceanic and Atmospheric Administration, Washington, DC.

2001, 410p

Related Categories/Subcategories

98F - Fisheries & Aquaculture

48B - Natural Resource Management

57H - Ecology

Keywords: Crabs, Gulf of Mexico, Fishing industry, Fish management, Marine resources, Conservation, Biology, Estuaries, Spawning, Habitats, Crustaceans, Blue Crab ('Callinectes sapidus'), Gulf States Marine Fisheries Commission(GSMFC)
